

Greetings, I am extremely opposed to the negative campaigning that the NAB is promoting against the XM instant traffic and weather programming. This is a competitive environment and NAB needs to suck it up. I absolutely enjoy all the programming available on the XM radio net and benefit from listening to its traffic and weather channels. XM satellite radio provides the "best" variety and quality that are not available elsewhere. You pay for these services and it should not be up, I repeat, not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve. Thank you for allowing me to voice my opinion on this matter.
